

Policy for use of club owned equipment

Aim

To provide a clear guideline around the personal use of club owned equipment, namely boards and skis, for the intention of competing, training for competition purposes or removing them from the clubhouse or immediate beach area at Venus Bay.

Background Information

After consultation with the Venus Bay SLSC Board of Directors, it was deemed necessary that the use of club equipment for personal use and/or the taking home of gear would be restricted to members who have their competition rights at Venus Bay SLSC.

Policy

To utilise club equipment for the purpose of competing or training to compete, including, but not limited to, removing gear from the club house and the beach front at the clubhouse, to a member's residence, is to be restricted to those that have competition rights that lay with Venus Bay SLSC.

Procedure

For eligible members, the personal use of club equipment i.e. skis and boards of any nature is to be endorsed by the relevant committee member or a board member prior to the item being removed from the club house.

The relevant committee member will need to document the date the item was taken and must set a date or time for its return. That

committee member will also be responsible for ensuring the item is returned and any damage reported and repaired.

Some equipment will be stored via a locked chain to maintain the quality of equipment for future competition use. For access to this equipment please contact the Board and Ski Captain or Director of Lifesaving. A code will be issued for access. The chain must be then locked in place after taking the piece of equipment. Once the equipment is returned, the code will be changed to avoid misuse.

Special Notes

Special permission may be granted if a formal request is emailed to the Director of Life Saving. The decision will be made based on a case by case nature and will be made after discussion with relevant committee or board members.
